Sufiya Tabassum

AI/ML Engineer | Data Science Graduate 2026 | Python | Machine Learning | LLM Evaluation | Generative AI | Open to Work
Greater Bengaluru Area

Summary

AI Full Stack Developer | Data Science Engineer | Machine Learning & Generative AI Enthusiast I am a Data Science Engineering graduate with hands-on experience in AI-powered full stack development, Machine Learning, Generative AI, and LLM evaluation. My expertise spans building scalable web applications, developing machine learning solutions, and improving AI systems through prompt engineering and RLHF-based workflows. During my internship at Ethara AI, I evaluated and enhanced Large Language Model (LLM) outputs for accuracy, clarity, and relevance. I worked on prompt optimization, AI response evaluation, and automation of evaluation pipelines using Python. My projects include a Machine Learning-based Cyber Breach Prediction System that achieved 87.6% accuracy, a Django-based Campus Complaint Resolution System, and a Finance Backend System built using REST APIs and SQLite. These projects strengthened my skills in Python, Flask, Django, SQL, Machine Learning, API development, and software engineering best practices. I am passionate about Artificial Intelligence, Machine Learning, Generative AI, Full Stack Development, and building technology that solves real-world problems. Currently, I am expanding my expertise in React, Node.js, LangChain, AI Agents, and cloud technologies. Skills: Python, SQL, JavaScript, Flask, Django, REST APIs, Machine Learning, Scikit-learn, Prompt Engineering, LLM Evaluation, Generative AI, Git/GitHub, MySQL Open to opportunities in AI Engineering, Machine Learning, Data Science, Generative AI, Python Development, and AI Full Stack Development.

Experience

Ethara AI
LLM Intern
February 2026 - Present (6 months)

Education

Sri Siddhartha Institute of Technology

· (August 2022 - July 2026)
