PROFESSIONAL SUMMARY

Recent B.E. Data Science graduate with hands-on experience in Python, SQL, Django, Flask, REST APIs, and backend application development through internships and academic projects. Strong understanding of the software development life cycle (SDLC), object-oriented programming (OOP), data structures, database design, and Agile methodologies. Passionate about building scalable, reliable software solutions and eager to contribute as a Software Engineer.

TECHNICAL SKILLS

Languages:	Python, SQL, Java (Basics), JavaScript (Basics)
Frameworks:	Django, Flask, REST APIs, HTML, CSS
Databases:	MySQL, SQLite
Tools & Tech:	Git, GitHub, VS Code, Jupyter Notebook
Software Eng.:	OOP, Data Structures, Algorithms, SDLC, Agile Methodology, Software Testing, Debugging, Version Control, Database Design

EXPERIENCE

Ethara AI LLM Intern	Feb 2026 – May 2026
- Developed Python automation scripts to improve AI workflow efficiency and data processing speed. - Performed software testing, debugging, and systematic validation of backend application outputs. - Collaborated with developers in an Agile environment to improve core backend processes and standups. - Enhanced application reliability through structured testing, modular debugging, and code reviews. - Utilized Git and GitHub for source code management, version control, and collaborative development.	

PROJECTS

Campus Complaint Resolution System Django, Python, MySQL	2026
- Developed a full-stack complaint management web application featuring interactive administration panels. - Implemented secure user authentication, multi-tier complaint tracking, CRUD operations, and admin controls. - Designed scalable database architecture schemas and optimized complex SQL queries to minimize latency. - Followed structured SDLC best practices from requirements analysis through iterative testing and deployment.	
Cyber Hacking Breach Prediction Flask, Scikit-learn, Python	2025
- Built a machine learning web application targeted for real-time cyber security threat and breach prediction. - Performed structured data preprocessing, feature engineering, model training, and performance evaluation. - Achieved an 87.6% prediction accuracy score while integrating the predictive model into a Flask application.	
Finance REST API Python, SQLite	2025
- Developed RESTful APIs supporting secure CRUD transactions, incorporating modular backend architectures. - Implemented strict input data validation layers and structured error tracking routines. - Improved overall code maintainability and clarity through highly reusable decoupled API components.	

EDUCATION

Sri Siddhartha Institute of Technology	Graduation: 2026
Bachelor of Engineering – Data Science	

CERTIFICATIONS & ACHIEVEMENTS

- Presented capstone project at the National Level Technodea 2026 Project Exhibition.
- Completed professional certifications: Full Stack Development (ExcelR) & Machine Learning (ExcelR).
- Finished the GenAI-Powered Data Analytics Job Simulation via Forage.
- Solid core background in software engineering principles, backend systems, Agile methods, and algorithm tracking.
